

INDIA CIRCULAR ECONOMY FORUM

ICEF2023

29-30 June

IHC,
New Delhi

INDIA CIRCULAR ECONOMY FORUM
ICEF2023

Hosted by
International Council for Circular Economy
(ICCE)

What is ICEF?

Transitioning from throwaway culture to a Circular Economy!

ICCE brings second edition of India Circular Economy Forum - ICEF2023

The annual India Circular Economy Forum (ICEF) presents India's leading circular economy solutions with business leaders, policymakers and experts participating from India and around the world.

Circular economy approaches can help businesses seize new opportunities and gain a competitive advantage, as well as contribute to achieving the United Nations Sustainable Development Goals.

ICEF is an initiative by ICCE that identifies key elements of a circular economy and showcases solutions and learnings, bringing together people from all sectors.

ICEF identifies, showcases, and celebrates Circular initiatives across India in different focus sectors. The forum features a futuristic approach for stakeholders to build and scale a circular economy by providing a platform to share insights, network, and learn from other circular economy practitioners. It inspires leaders to develop strategies that would help them create pro-planet people.

Glimpses of ICEF2022

The first edition of ICEF in 2022 saw thought leaders, industry experts and practitioners who drove the ambition and action plan for transitioning from a take-make-waste paradigm to a truly circular economy. The recommendation helped to drive sustainable development and to address climatic change. The forum was recognized as India's largest congregation on Circular Economy that focusses on India with a global outlook.

Our international partners at #ICEF2022
EEB, Brussels
Circular Regions, Norway
CITEO, France

Signing of #MoU with CREDUCE to introduce and promote C-Credit market in #India

Foreword

The India Circular Economy Forum (ICEF) is the annual flagship initiative organized by ICCE. Instituted in 2022, the forum introduces Circular Economy at all levels, in all industry sectors. The first edition of ICEF in 2022 brought together thought industry leaders, heads of state and government, scholars, corporates, youth groups, not for profit sector and civil society representatives from across the world. The ICEF has been recognized as a responsible and an effective platform for mobilizing opinion-makers to advance actions to address some of the most relevant issues concerning sustainable development, resource efficiency and climate change.

ICEF as emerged as an independent forum on Circular Economy based in Global South, with a global outlook and outreach. The forum has helped develop international cooperation and collaborations apart from assembling the world's most enlightened leaders and thinkers. Multiple plenaries, thematic sessions, international dialogues, exhibitions on sustainable production and consumption and innovations highlighted ICEF in the global community. Last edition witnessed the participation of 3 Ministries, 62 speakers, over 200 Business Leaders, and 400 Delegates.

SDG 12 entails decoupling economic growth and environmental degradation and demands more efficient and environmentally friendly management of resources, including improving energy efficiency, sustainable infrastructure, access to basic services, and providing green and decent jobs to ensure a better quality of life for all. Under this consideration, the deliberations at ICEF2023 would focus on planetary resilience, for benefitting economy as well as Planet Earth.

ICEF2023 will once again a play an important role in not just providing a platform for dialogues, but also to create new knowledge outputs, where leaders from various sectors will come together and reflect upon their experiences. Youth will share latest research and innovation in these sectors to enhance the transition from a take-make-waste economy.

Statistics
